Your paving, your style...

"it's your choice"

It's never been easier to inject some life and personality into your paving and concrete surfaces. Whether it be a new fresh colour or a decorative finish, Pascol has you covered from start to finish. Transform ordinary concrete into a luxurious floor that resembles marble or glazed stone with the Pascol family of coatings.

Top Tip
Not sure which product to use? Use the Product Application Guide on the back page to find out which products and surfaces are best suited for your project.

Get Inspired: Whether you’re repainting the old driveway, laying down a new finish for the garage, spicing up a patio, pool decks or even decorating an interior slab, use this brochure to help you decide what’s best for your project.

Surface preparation is key to the success of your project and provides extended coating life. Your surface must be clean, dry and free of dirt, grease, oil or other contaminants before applying any coating.

Choose a Finish: Are you going to use paint, use a clear protective sealer or perhaps go for a more decorative finish? Whatever your choice Pascol has more than enough colours, sealers and finishes to suit your style.

THE BOND-LOK ADVANTAGE
Selected Pascol products contain technologies that work to maximize the bond between the floor coating and the concrete. This bond extends the life of your finish, giving you maximum durability. (See side of pack for details).
Paving Paints

Makes concrete look new

Make your paving a focal point and enhance the style of your home with Pascol paving paint. Why stop there...transform your garage floors, highlight a pathway, show off your patio, enhance the pool deck and even breathe life into bare concrete floors.

**PASCOL 1-PART EPOXY PAVING PAINT**
For concrete or masonry garage floors, driveways, paths, patio and interior floors.
- Resists hot tyre pick-up
- Protects against UV rays & chemicals
- 2 hour recoat
- Satin finish
- Water based
- Suitable for interior and exterior use

**Top Tip**
- For additional slip resistance add Pascol Anti-Skid Floor Texture Additive
- Optional topcoat: use Pascol Multi-Purpose Sealer for added protection

**PASCOL SOLID COLOUR PAVING PAINT**
For concrete, brick, pavers, masonry, pool decks, driveways, paths and patios.
- Beautifies old concrete
- Protects against UV rays and chemicals
- Low gloss finish
- Recoat in 24 hours
- Solvent based
- Suitable for exterior use

**PASCOL NON-SLIP PAVING PAINT**
For concrete, masonry, steps, patios, paths and pool decks. Not suitable for drive-on surfaces such as driveways and garage floors.
- Heavy-duty polymer-fibre matrix
- Maximum slip resistance
- Protects against UV rays & chemicals
- Flat finish, high profile non-slip finish
- Recoat in 2 hours
- Suitable for interior and exterior use

All printed colours have been matched as close to the actual paint colour as the printing process will allow. Slight variation in shades may occur.
Decorative Concrete Finishes

Coloured stone look

Turn ordinary concrete surfaces into an inviting space with Pascol Semi-Transparent Concrete Stain. The natural variations and textures of concrete, brick and pavers can be highlighted to give the appearance of natural coloured stone or slate. Alternatively be creative and invent your own style by mixing two finishes together.

PASCOL SEMI-TRANSPARENT CONCRETE STAIN

Use on concrete, aggregate, brick, pavers, flagstone, pool decks, driveways, paths and patios. Not suitable for garage floors.
- Durable acrylic-urethane formula
- Protects and beautifies, provides a multi-coloured appearance that looks like natural stone
- Highlights natural variations and texture of surface
- Recoat in 4 hours

Top Tip
Optional topcoat: use Pascol Multi-Purpose Sealer for added protection

- Cavern Pool
- Beach Stone
- Grey Ash
- Melbourne Slate
- Wood Charcoal

Pascol Semi-Transparent Concrete Stain Colour Range

- 1 COAT
- 2 COATS
- 2 COLOURS

NATURAL STONE FINISH

APPLICATION

Pascol Semi-Transparent Concrete Stain allows you to achieve a variety of different looks depending on the application used. Below is a reference on how the finish may appear when applying various numbers of coats or colours.

Top Tip
Try combining 2 or 3 different colours for a truly unique look. Be creative and experiment to get just the look you want.

The final appearance depends on the concrete texture, porosity and how the stain is applied. The final stain colour will draw attention to any (lighter or darker) patterns in the prepared concrete.

Looks like marble

PASCOL ETCHING STAIN

Pascol Etching Stain reacts with the minerals present in your concrete to provide a permanent decorative finish. It transforms the colour of your concrete to a contemporary, multi-toned rich marble appearance. For concrete pool decks, driveways, paths and patios.
- Permanent multi-toned rich marbled appearance
- Water based
- Seal stain with Pascol Etching Stain Sealer

EXTERIOR USE ONLY
AVAILABLE IN 2 COLOURS

PASCOL ETCHING SEALER

For concrete pool decks, driveways, paths & patios.
- Heavy-duty resin formula
- Enhances & seals the colour & design of Etching Stain
- Solvent based

Coffee
Tan

All printed colours have been matched as close to the actual paint colour as the printing process will allow. Slight variation in shades may occur.
Clear and waterproof sealers

Protect & beautify

Seal and protect your paving with quality sealers that will enhance its colour and ensure your efforts are long-lasting. Choose from our range of water based sealers for the ultimate finish.

PASCOL MULTI-PURPOSE SEALER
For concrete, aggregate, masonry, brick, slate, garage floors, driveways, paths and patios.
- Heavy-duty resin formula
- Resists hot tyre pick-up
- Resists petrol & oil stains
- Recoat in 2 hours
- Suitable for interior and exterior use

PASCOL WET LOOK SEALER
For pebblecrete, aggregate, concrete, brick, pavers, masonry, slate, flagstone, driveways, paths & patios.
- Heavy-duty resin formula
- Resists water, petrol & oil stains
- Enhances surface appearance
- Recoat in 2 hours
- Suitable for interior and exterior use

PASCOL NATURAL LOOK SEALER
For pebblecrete, exposed aggregate, concrete, brick, pavers, masonry, slate, mortar, flagstone, driveways and patios to enhance their natural beauty.
- Penetrating silicone formula
- Deep penetrating to form a protective barrier against water
- Retains natural matt look of the surface
- Recoat in 10 minutes (wet on wet)
- Suitable for exterior use only

Top Tip
Can be used over Pascol Semi-Transparent Stain or 1-Part Epoxy Paving paint

Top Tip
Avoid using this product on non-porous, sealed surfaces. To test, place a few drops of water on surface. If water sinks in, the surface is porous enough to use this finish. If water remains on the surface, do not use.

Decorative Colour Flakes
Create a designer look

Pascol Decorative Colour Flakes enhance the appearance of your concrete surface while masking any slight imperfections and deliver a polished and eye-catching look.

PASCOL COLOUR FLAKES
- Use in conjunction with Pascol 1-Part Epoxy Paving Paint & Multi-Purpose Sealer
- Over 100 colour combinations
- Suitable for interior and exterior use

Top Tip
Using Natural Look Sealer is the perfect solution to protect and keep paving looking clean and new.
Surface Preparation

The key to a successful project

To obtain the best results be sure to use Pascol Oil Stain Remover to lift stains without scrubbing or Pascol Bond Lok to clean, etch and degrease your concrete before you begin.

PASCOL OIL STAIN REMOVER
• Absorbs and lifts stains from concrete without scrubbing
• Pour on and brush off
• Cleans away stains and oil spots prior to painting or sealing

PASCOL BOND•LOK™
• Cleans, degreases and etches concrete
• Improves penetration & adhesion of paints & sealers
• Provides maximum durability of top coat

THE BOND-LOK ADVANTAGE
Selected Pascol products contain technologies that work to maximize the bond between the floor coating and the concrete. This bond extends the life of your finish, giving you maximum durability.

HINTS & TIPS

Surface Preparation: Correctly preparing the surface is the most important step when using Pascol Paving and Concrete Paints. This is an integral part of the process that will allow you to achieve an amazing, long-lasting finish. It is crucial that you adhere to all the detailed instructions on the label before you start the project.

New Concrete: New concrete surfaces must be left to cure for at least four to six weeks before applying Pascol Paving and Concrete Paints.

Previously Painted Concrete:
• Pascol Paving and Concrete Paints can be applied to concrete surfaces that have been previously painted. Following the instructions provided on the label will guarantee your chosen surface is in a perfect state to be repainted.
• All loose, peeling or flaking material must be removed before application. Sand gloss or semi-gloss enamel surfaces until gloss is removed.

Application Information:
• When painting the surface it is imperative not to apply too much at once. Adhere to the coverage level on the label to achieve the best result. Remember two coats of paint are better than one thick layer.
• When applying paint it is best to work in section of 1 to 2 square metres at a time.
• Depending on whether you are working in cooler or humid climates, allow the paint to dry for longer periods. In some cases allow for double the allocated drying time.
• To guarantee the correct consistency of paint colour throughout the applying process, box and combine your required amount of paints that will be needed to complete the project.
• Avoid painting driveways and paths during the heat of the day, as this may prevent penetration and adhesion of the paint.

Anti-Skid option

PASCOL ANTI-SKID FLOOR TEXTURE ADDITIVE
For steps, pool areas, floors & porches. Anti-Skid Floor Texture Additive will not change the colour, properties or performance of the coating. Particularly valuable in areas used by children and the elderly, or areas subject to wet conditions.
• Add Pascol Anti-Skid Floor Texture Additive to increase traction and provide a skid resistant surface.
